Gems are wonderful creations of nature. Crystals have many special properties and find applications in scientific areas including electronics. Crystal oscillators, diodes, piezo-electric crystals etc. are examples. Gem stones are found in natural form in many shapes and colours. They differ in physical and chemical properties from one another. The stones are cut and polished to give the required beauty and shine.

From ancient times scholars have associated gems with planets, based on the colour and the effect that is produced by wearing the same. Not only the Indians but Chinese and Egyptians believed in the mystical and therapeutic qualities of gem stones.

The science of gems and astrology is now brought closer to the common man as a result of the research work done by Astro-Vision.

## Quality of Gem and its fixing

Purchase good quality Gems from dependable sources only. It is important to set the gems in the right metal prescribed. Do not go by the cost or appearance. Gems should be set by an expert in such a way that the rays of the Sun can pass through the gem and reach your body. (The bottom of the gem should not be covered by metal). The gems should not be exposed to heat or scratched by sharp objects. It is better to remove the gems while bathing.

## Personal preparation to begin

The day you start wearing the Gem for the first time should be given due significance. Your mental preparation and cleanliness is of great importance. For this purpose you are free to follow the rituals according to your faith and practice.

Select a suitable date keeping in view the DAY suggested for each Gem and your personal convenience. Make a note of the time of SUNRISE at the place where you stay. It may have to be reviewed depending on the changes in your personal life and dasa periods. More over the importance and priorities you attach to the problems may also shift from time to time.
