Star Remedies

Hrithik, as you are born in Pushya star, your star lord is Saturn. You don't like to compromise, even for silly things. This may be an impediment in the achievement of your goal. On the basis of the birth star, the Dasa periods of some planets may be generally unfavorable to you. The birth star being Pushya suggests that you may have unexpected difficulties during the dasa periods of Kethu, Sun and Mars.

There will be a number of visible changes in your thoughts during this period. Situations may arise where you have to take a strong stand to achieve your goal. Nevertheless, don't let others brand you as a short-tempered person. Your decisions may waver at times. Health will demand extra attention during this period.

The lord of the birth sign Karkata is Moon. Situations may arise where you have to express your thoughts. You may experience delay in coping with the realities of life. It will be beneficial, if you try to understand that our words and deeds affect others. Fix limits to your likes and dislikes in domestic life. The stars of Makha, Utaraphalguni, Chitra, Dhanishta (Kumbha sign), Satabhisha and Purvabhadra (Kumbha) are considered inauspicious for transactions and functions.

You must practice restraining your words and behaviour during the unfavourable Dasa periods, especially on the hostile stars. Try to stay away from unnecessary tussles. It is best not to interfere in others' matters during this period.

Practicing customary remedial measures will help to mitigate the negative effects.

Visiting the temples either daily or on the stars of Pushya, Anuradha and Uttarabhadra is beneficial. Visit the temples of Lord Ayyappa on Saturdays or on the days in which Thursdays and Punarvasu star come together to please Saturn. Fasting devotedly in these days will give good results.

Circumambulating the papal tree while meditating the lord of the star Saturn, on Saturdays, is beneficial. Besides, it is best to skip rice meal once on Saturdays. Selecting and wearing black, white and blue dresses is also auspicious.

Besides, measures to please the lord of the sign, Moon will be beneficial.

Ashtakavarga

Ashtakavarga system is a predictive method of Indian Astrology that uses a system of points based upon planetary positions. Ashtakavarga means eightfold categorization. It depicts eightfold strength of planets excluding the nodes of the Moon but including the ascendant. It is worked out according to certain well-established rules for measuring the planetary strength. The strength of each planet and the power and intensity of their influence depends upon the location of other planets and the ascendant in relation to it. Eight full points are assigned to each planet. They can obtain strength varying from zero to 8 points which, plotted on different signs in a chart, determine the possibility of a transiting planet in inducing auspicious or other effects during its sojourn in a particular sign. Events and their timings are to a large extent determined by the positioning of particular points. Depending on their negative or positive influences the native can take remedial measures or pre-empt unpleasant possibilities, just by being aware of the likely consequences. To be forewarned is to be forearmed --- the planets are one of the best guides to help condition mans mind to the possibilities of his future.

Corresponding to each planet, a sub-planet (Upagraha) is calculated. The sub planets of Moon, Venus, Mars, Rahu and Ketu are based on the longitude of the Sun as follows.

Dhumadi Group of Sub-Planets

Planet	Upagraha	Method of Calculation
Mars	Dhuma	Longitude of Sun + 133 Deg. 20 Min.
Rahu	Vyatipata (Pata)	360 - Dhuma
Moon	Parivesh (Paridhi)	180 + Vyatipata (Pata)
Venus	Indrachapa (Kodanda)	360 - Parivesh (Paridhi)
Ketu	Upaketu	Indrachapa (Kodanda) + 16 Deg. 40 Min.

The sub-planets of Sun, Mercury, Jupiter, Saturn and an additional sub-planet of Mars are calculated based on the division of day or night into eight equal parts.

The first part belongs to the lord of the day, followed by the remaining lords of the week in cyclic order. The eight part is lordless. In the case of birth at night, out of the eight equal parts, the first seven are allotted to the lords of the planets starting from the 5th. weekday.

Two different methods are popularly adopted for finding the longitude. In the first method an ascendant is calculated for the beginning of the period ruled by the planet. In the second method, the end of the period is taken.

In the case of Gulika, the sub-planet of Saturn, a third method is also available to calculate the longitude of the dhumadi group of subplanets based on fixed values of rise time as given below.

Days	Birth during day	Birth during night
Sunday	26	Ghati (Nazhika) 10 Ghati (Nazhika)
