Gem Recommendation

Gems are wonderful creations of nature. Crystals have many special properties and find applications in scientific areas including electronics. Crystal oscillators, diodes, piezo-electric crystals etc. are examples. Gem stones are found in natural form in many shapes and colours. They differ in physical and chemical properties from one another. The stones are cut and polished to give the required beauty and shine.

From ancient times scholars have associated gems with planets, based on the colour and the effect that is produced by wearing the same. Not only the Indians but Chinese and Egyptians believed in the mystical and therapeutic qualities of gem stones.

The science of gems and astrology is now brought closer to the common man as a result of the research work done by Astro-Vision.
